ABOUT ME

I'm an AI and Full-Stack Developer experienced in building scalable APIs and intuitive frontend interfaces. I focus on creating reliable, efficient, and user-centered digital experiences through thoughtful engineering.

WORK EXPERIENCE

Software Engineering Intern — Poorna Technologies Consulting Oct 2025 – Present

- Assisted in feature development, debugging, and improving application performance.
- Collaborated with engineers to write clean, maintainable code and enhance system reliability.

AI Virtual Intern — Infosys Springboard Nov 2025 – Present

- Contributed to AI-NutriCare, an ML-based personalized diet plan generator.
- Gained hands-on experience in data preprocessing, model logic, and structured AI development sessions.

PROJECTS

ACAD-Assist — AI Learning Companion — React, FastAPI, Gemini AI

- Built the complete RAG system using FastAPI, LangChain, Gemini Embeddings, and FAISS.
- Implemented PDF ingestion, chunking, embeddings, and retrieval for accurate textbook-based Q&A.

Carbon Footprint Analyzer — HTML, React, Django

- Developed a web tool to calculate and visualize CO₂ emissions for Indian coal mines.
- Integrated an AI chatbot that recommends emission-reduction strategies and sustainability actions.
